

In the Claims

Please amend claims 1 and 12 as follows:

1 1. (Amended) Apparatus for locating an RFID transponder vertical location  
2 comprising:  
3 an RFID transponder for broadcasting identification data;  
4 a plurality of ~~antennae~~antenna for ~~recovering~~receiving said identification  
5 data broadcast by said RFID transponder, said identification data from said RFID  
6 transponder capable of being received by more than one antenna at different location  
7 sites;  
8 a plurality of support members at spaced apart vertical locations suitable for  
9 supporting said RFID transponder, and each of said spaced apart support members  
10 associated with at least one of said plurality of ~~antennae~~antenna; and  
11 control circuitry connected to said plurality of antenna for determining which  
12 individual antenna at different location sites of said plurality of antenna receives said  
13 identification broadcast from said RFID transponder and for determining the location of  
14 said RFID transponder as a function of all of the antenna receiving said broadcast data  
15 and the support members associated with the antennae receiving said identification  
16 data.

1 12. (Amended) A method of locating an RFID transponder in space comprising  
2 the steps of:  
3 broadcasting identification data from an RFID transponder;  
4 receiving said broadcast identification data at a plurality of antenna at  
5 different location sites;  
6 providing a plurality of spaced apart support members at known vertical  
7 locations suitable for supporting said RFID transponders, and each of said spaced apart  
8 support members associated with at least one of said plurality of ~~antennae~~antenna;  
9 determining which antenna at the different location sites receives  
10 identification data broadcast from said RFID transponder; and  
11 determining the three-dimensional location of said transponder  
12 broadcasting said identification data as a function of the antennas receiving said

- 5 -

- 13 information data and the support members associated with the antennas receiving said
- 14 identification data.

A handwritten signature or set of initials, possibly "JBR", written in dark ink. It is located on the left side of the page, above a horizontal line that spans the width of the document.
